PressureGuard CFT

by Span America

Available in Hospital, Twin, Full, Queen & Split King

Weight Capacity 500 lbs

- As position shifts, reservoirs absorb displaced air to accommodate load & equalize pressure
- Proven for both prevention & healing of any stage pressure ulcer
- Generates no noise or heat & uses no electricity

People with limited mobility are often at risk for pressure sores or skin break downs. The most common locations are the tail bone, side of the hips & the heels of the feet. Heat, moisture, friction, pressure & shearing are factors contributing to skin break down. Proper repositioning is a key to pressure ulcer prevention by reducing pressure points, overheating & skin moisture. Frequent position changes, every 2 hours, also allows the caregiver to check for incontinence & prevents excessive skin moisture.

AccuMax Quantum VPC Surface

by Hill-Rom

Available in 75", 80" or 84" x 35.5"

Weight Capacity 500 lbs

- Non-powered air bladders provide advanced pressure redistribution
